

JB POOL CONSTRUCTION

INFINITE BEAUTY

THE PINNACLE OF STYLE

Endlessly extending towards the horizon, this breathtaking infinity-edge pool is the jewel in the crown of this remarkable Kingsholme property. Specialising in residential pools for discerning clientele with high expectations for a quality build, it's no surprise that JB Pool Construction was selected for this outstanding project.

With views that stretch across from the Gold Coast hinterland and cane fields to Moreton Bay and Stradbroke islands, the owners of the property wanted a layout and design that would capture the panorama and integrate with the pavilion-style of the home. JB Pool Construction worked in conjunction with architect Chris Vandyke Designs and V-Build Construction Services to achieve the stunning results pictured here.

The 6.5m x 4.4m curved infinity-edge pool is fully-suspended two metres above the ground. Due to the contours of the land and the infinity-edge design, screw pier foundations were required to anchor the pool into the hill and create a uniform and stable foundation that would support the fully-suspended structure.

Internally the pool features glass mosaic waterline tiles and a glass aggregate interior. Externally the pool continues the home's use of travertine with its coping and surrounding tiles. The sandstone featured around the base of the pool has also been used throughout the build, from the fireplace to the retaining walls.

The pool features pumps and filtration by Hayward, with a Pure Silk water management system featuring automated control and dosing. An Oasis 35kW heat pump gives the pool year-round heating, while the Spa Electric niche pool lights allow the pool to be enjoyed day and night.

JB Pool Construction was established in 2007 by director Jamie Bramich, who brings more than 18 years of experience in the Gold Coast swimming pool industry. As a member of the Queensland Master Builders Association, Jamie strives for excellence in building and customer service.

Dealing directly with the business owner, who is also the sales person, designer, project manager and builder, clients of JB Pool Construction receive a personalised one-on-one building experience. From the initial site inspection, quotation and design, to contractual documents, engineering, certification and local council approvals, clients deal directly with Jamie.

JB Pool Construction offers an obligation-free site inspection, measure and quote to all of the Gold Coast, Brisbane, Scenic Rim and surrounding areas.
